PRESENTATION OF RESOURCES USED FOR PILOT PHASE

During the second phase of the AI4T project, the Large Scale Experimentation Phase, a range of resources were used/shared by the partners.

Some of these are brought together in this section in the following organisation

- Resources are presented by partner and are available in the partner language (is. a document use for a Webinar in France is available in French)
- This section is not exhaustive and cannot be considered a definitive reflection of the resources produced and used during the large-scale experimentation phase.
